

Surge Protective Device

Technical Documentation

ACCESSORY SOLD SEPARATELY

Completely protect your pet from leaving your property, by adding on the M1DF power surge protector to your underground dog fence system. The M1DF dog fence surge suppressor will fit and protect all Radio Fence 110V AC Transmitters.

If lightning strikes, not only can it damage the transmitter, but every inch of wire, buried or exposed, is also vulnerable. This easy to use surge protector plugs directly into your wall outlet. The M1DF dual protects the wires from the perimeter

loop and the transmitter as well as the AC plug. This small, yet powerful surge protector also guards your in-ground dog fence systems from power surges.

Key Specs

- **Space Saving Design**
- **Positive Loop Connectors**
- **Power Indicator Light**

**See Ordering Information for model number selection*

Features

- **Product Warranty**
- **Designed to protect electronic pet containment systems transmitters against damage from lightning and AC surges.**

General Technical Specifications

Line Voltage	120 VAC 50/60 HZ, 15 Amps
Protection Modes	(L-N, L-G, N-G)
Connections	Easy Spring-Clip
Power Indicator Light	Yes

Ordering Information

MODEL

M1DF-69

Read and Understand

Note:

- **WARNING:** Before digging to bury the loop wire of your electronic dog fence, make sure that there are no buried power, telephone, or other electrical cables in the vicinity. Many underground cables carry high voltage and digging into them, or laying your loopwire on them, may lead to hazard from shock or electrocution.
- **For indoor use only.** Contact your local code authority for standards and practices for the egress of the transmitter wire to the outside.
- The Hidden Dog Fence Surge Protector is specifically designed for electronic pet fence systems and will not protect other kinds of equipment against lightning or AC surges. There is no warranty for any equipment connected to this protector.

Installation:

Please see installation instructions included in package.
